Functional Verification Activities

	Yes	NA
Blow Down Air Supply at Header, Open and Drain Instrument Regulator		
Valve is Sliding Stem : Rotary : Quarter Turn : Throttle : Snap Acting		
Verify Fail Position: Valve Fails Open : Valve Fails Closed : Valve Fails Last		
Verify Positioner Command Signals: mA : %		
Valve and Actuator Strokes Smoothly on Command From DCS/PLC		
Verify Open and Close Limit Switches Function and are Displayed Correctly on DCS/PLC.		
Verify Solenoid Trip and Valve Strokes to Fail Position		
Verify Positioner is Returned to IN SERVICE		

Positioner / Valve Travel Indication Function checks
